Download Windows 10 Disc Image (ISO File)

Before updating, please refer to the [Windows release information status](#) for known issues to confirm your device is not impacted.

Stay Secure with Essential Windows Updates: After October 14, 2025, Windows 10 will no longer receive free software updates, technical support, or security fixes. This means your PC will be more vulnerable to security threats and malware. **Consider Upgrading to Windows 11:** Move to the security, speed, and innovation that Windows 11 PCs provide, available at every price point. Upgrading to Windows 11 ensures you continue to receive the latest security updates, features, and technical support, keeping your PC safe and efficient. For more information on preparing for Windows 10 end of support, see our [Windows blog post](#).

You've been routed to this page because the operating system you're using won't support the Windows 10 media creation tool and we want to make sure you can download Windows 10. To use the media creation tool, visit the [Microsoft Software Download Windows 10 page](#) from a Windows 7, Windows 8.1 or Windows 10 device.

You can use this page to download a disc image (ISO file) that can be used to install or reinstall Windows 10. The image can also be used to create installation media using a USB flash drive or DVD.

Downloads

Choose a link below to begin the download.

Windows 10 Arabic

[32-bit Download](#)

[64-bit Download](#)

▾ Verify your download

If you would like to verify the data integrity and authenticity of your download, you can follow these steps:

1. Download the desired product ISO file and follow the installation guidelines.
2. Launch Windows PowerShell. If you need help finding the location of PowerShell for your operating system, get help [here](#).
3. In PowerShell, compute the hash value for the ISO file you downloaded using the Get-FileHash cmdlet. For example:

```
Get-FileHash C:\Users\user1\Downloads\Contoso8_1_ENT.iso
```
4. If the SHA256 output matches the value in the below table, for the product that you downloaded, this confirms that the file has not been corrupted, tampered with or altered from the original.

Get additional information on the [Get-FileHash](#) command.
